**Subject : Letter of support for *Space Capsules (Hubble Achievement)***

To whom it may concern,

This letter is submitted by the Cosmodôme de Laval on Mr Moidel of Space Viz Productions.

The global mission of the Cosmodôme is to educate the general public about science and to familiarize kids and adults with the history of space exploration. In addition to Space Camp Canada, which is the only space camp facility in Canada, the Cosmodôme is also home to the Space Science Centre, a fascinating and exceptional learning environment.

We understand that Mr Moidel is applying for a grant for a project entitled *Space Capsules* and we would highly recommend that you support this project.

Hubble's mission is to give us a better understanding of the Universe by providing answers to questions mankind has been asking for millennia about our place in the Universe and our origins. Hubble has been able to answer many cosmological questions while raising new ones. Hubble's eye have enabled film makers, like Mr Moidel, to teach people about astronomy; which is our mission as well. *Space Capsules*, I strongly believe, would be of great interest to the public at large. It will also provide much needed, science-based, graphically enthralling content for the Space Camp Canada which is extremely difficult to find on the market.

The 48 minutes format will fit in nicely with our store needs while the 4 minutes capsules will be a perfect fit for our quick pace workshops and it would undoubtedly be beneficial to our visitors and customers.

Yours sincerely,

Yves Séviény  
Educational content Supervisor
