

The Apollo Years

All Reviews (to date)

"I found it very interesting in that there is no narration. Good film sequences... great reminders of the people and things that led to the first landing. Good job."

- **Russell L. "Rusty" Schweickart**, Apollo 9 Astronaut, July 7, 2009

"For those of us who witnessed the Apollo program it brings back memories and reminds us how things have changed (some unrelated to the main theme, like flight controllers sitting at their duty stations smoking!). For younger viewers it will serve as a good entrée for discovering and understanding the early space program."

- **Alan W. Harris**, Space scientist with North American Rockwell (**builder of the Command Module**) during the time of Apollo, later with Jet Propulsion Laboratory (JPL), July 8, 2009

"Letting the people, events, and images speak for themselves brings an unmatched authenticity to this remarkable chapter in human exploration. Very well done."

-**Neil deGrasse Tyson**, Astrophysicist and Frederick P. Rose Director, Hayden Planetarium, American Museum of Natural History, New York City, July 26, 2009
